

Monnit WIT™ Wireless Sensor data can be sent to a Sensing Planet widget through the MonnitSphere™ Online Monitoring System.

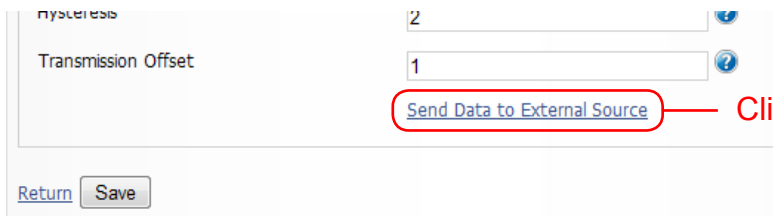

1. Login to your MonnitSphere Online Portal.

2. Click the “Edit” icon in the Sensor List for the Sensor you would like to share data from.

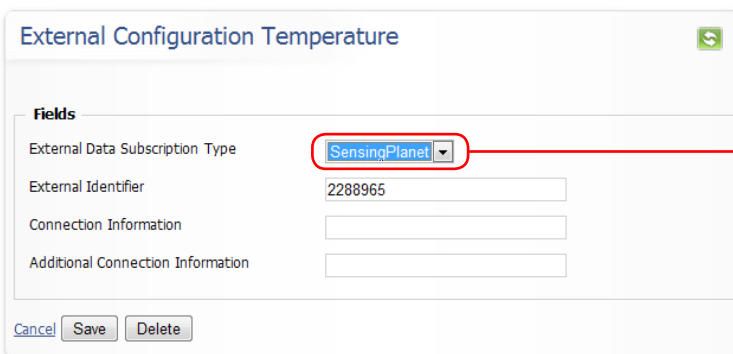

Click the Edit Icon

3. At the bottom of the edit page click “Send Data to External Source”.

Click “Send Data to External Source”

4. Choose “Sensing Planet” from the drop down menu.

Select “Sensing Planet”

5. Enter your SPID in the External Identifier box then click "Save".

(Connection information is not needed to communicate with the Sensing Planet Widget.)

External Configuration Temperature

Fields

External Data Subscription Type: SensingPlanet

External Identifier: 2288965

Connection Information:

Additional Connection Information:

Buttons: Cancel, Save, Delete

Enter your Sensing Planet ID

Click "Save"

6. Login to your Sensing Planet dashboard to view your sensor data. To access the Sensing Planet portal, please register with Sensing Planet at:
